

The Reflex® Series provides the designer with unmatched versatility. Designed for installation in ceilings or walls, this fixture provides substantial indirect lighting, as well as superb wall wash capability. Reflex® can also be installed at aisle level for illumination of corridors and hallways.

The clean lines of the Reflex® design are complimented by a variety of architectural grade trims and tempered glass lenses. One piece seamless reflectors are available in a stylish array of architectural finishes. Engineered to fit neatly between the studs of new construction or renovations, the simplicity and elegance of our Reflex® design make this fixture an ideal choice for retail, hospitality or corporate applications.

SEAMLESS CORNERS

A variety of custom glass panels are available such as dichroic, colored, custom etched and designer panels, such as Solite™ Panel Glass, Clear Glass Panel, Skytex Horizontal Panel Glass, Skytex Vertical Panel Glass.

Please consult factory to discuss your specific requirements.

REFLEX® SIMPLE 3 STEP ASSEMBLY

The Reflex-LED integrated, adjustable mounting frame installs in 3 easy steps. The backbox is mounted in the wall and adjusted level. Secondly the Reflex® reflector slides seamlessly into the back box to enhance the LED output. The self leveling, spring mounted trim easily attached to the fixture to complete the look with clean architectural detailing.
