Wood is a great ally of cozy lighting. It is a material that is hard to mold, a challenge that the LED-Ginger collection neatly resolves. The combination of sheets of wood and paper pressed together under high pressure achieves a laminate that appears almost entirely flat.

For mounted canopy installation

Take into account the total power in watts, the power of the driver, and the wire entry points of the canopy. The total wattage of the selected lamps elements cannot exceed the max wattage of the canopy's driver. Therefore, you must choose your canopy/driver by the power required. Finally, the number of lamps installed in a single canopy cannot exceed the number of wire entry points of that canopy.
