

WARNING: Risk of fire or electric shock. Installation requires expertise in LED lighting fixture electrical systems. If unqualified, do not attempt installation—contact a certified electrician.

14133 – INSTALLATION INSTRUCTIONS

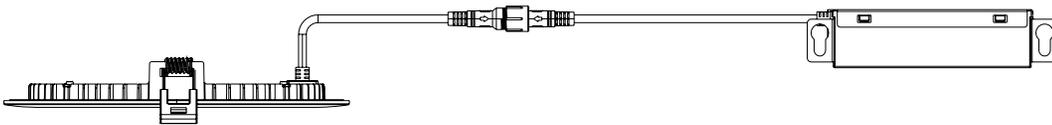

READ BEFORE INSTALLATION:

1. Turn off power at the main circuit breaker before starting.
2. Installation must be performed by a licensed electrician.
3. Follow all local codes and regulations.

WARNING

- **Risk of Fire or Electric Shock:** Electrical current can cause serious injury or death if not handled properly. Always disconnect power at the circuit breaker before starting installation.
- **Qualified Personnel Only:** Installation must be performed by a qualified electrician familiar with luminaire systems, in accordance with the National Electrical Code (NEC) and all applicable local building codes.
- **Prevent Wiring Damage:** Do not expose wiring to sharp edges or sheet metal. Use protective gloves when handling fixture components.
- **Code Compliance Required:** Final installation must be inspected and approved by a licensed electrical/building inspector. Improper installation may result in serious hazards.

PACKAGING CONTENTS

LED Module + Driver

(3) Push-in Connectors

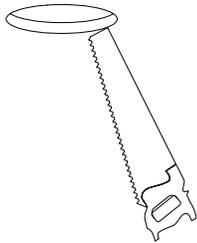

WARNING: Risk of fire or electric shock. Installation requires expertise in LED lighting fixture electrical systems. If unqualified, do not attempt installation—contact a certified electrician.

14133 – INSTALLATION INSTRUCTIONS

INSTALLATION STEPS

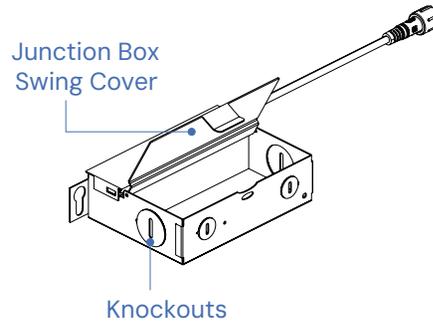

Locate a suitable position to mount the fixture and use the cutout from the packaging to mark and cut the ceiling hole.

CUT-OUT DIMENSIONS	
4" FLAT	4- ¹ / ₈ "
6" FLAT	6- ¹ / ₄ "

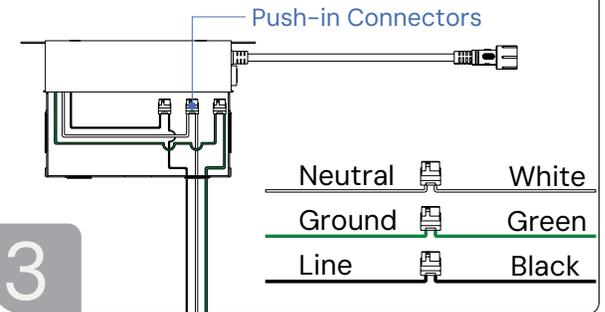

1 **NOTE:** Ensure that electrical wires from switch or power supply can be accessed through mounting hole.

Open the junction box swing cover and remove the appropriate knockout(s).

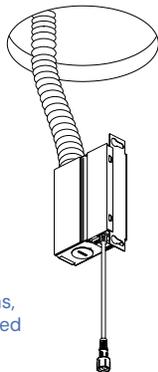

2

Route power supply leads through the junction box's knockout. Connect line, neutral, and ground to the corresponding push-in connectors.

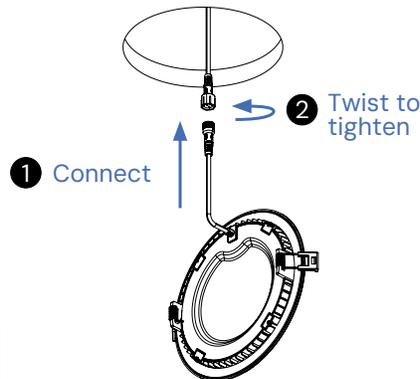

3

Safely place all wiring into the junction box and insert junction box through ceiling hole.

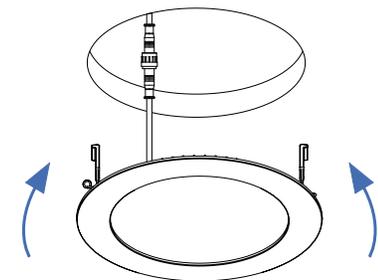

4 **NOTE:** For new construction applications, junction box shall be firmly secured to studs, joists, or similar fixed structural units.

Connect luminaire and junction box quick connects. Twist the screw cap until fully tightened.

5

Push the spring-loaded clips on the LED module upwards and insert the LED module through the mounting hole vertically, clips first.

6

WARNING: Risk of fire or electric shock. Installation requires expertise in LED lighting fixture electrical systems. If unqualified, do not attempt installation—contact a certified electrician.

14133 – INSTALLATION INSTRUCTIONS

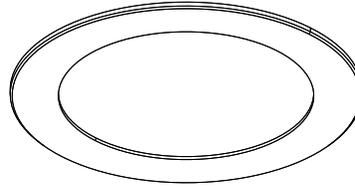

INSTALLATION STEPS

Push the spring-loaded clips on the LED module upwards and insert the LED module through the mounting hole vertically, clips first. Ensure that driver is not placed directly above luminaire.

7

Installation complete. Turn on power.
If luminaire does not turn on within 5 seconds:
turn power off, remove luminaire, and double
check all wiring.
