WARNING

- Risk of fire. Use 120/277V circuit.
- Risk of shock. An electric current can cause painful shock or serious injury unless handled properly. For your safety, always remember to turn off the power supply at the fuse or circuit breaker box before you install the fixture and ground the fixture to avoid potential electric shocks and to ensure reliable starting.
- Risk of cuts. Some metal parts in the fixture may have sharp edges. To prevent cuts and scrapes, wear gloves when handling the parts.
- This fixture is designed for use in a circuit protected by a fuse or circuit breaker. It is also designed to be installed in accordance with local electric codes.
- If you are unsure about your wiring, consult a qualified electrician or a local electrical inspector, and check your local electric code.
